1 UNITY: observe and update state
Target geometry; gaze validity and object hits; controller aim; trial state
Recent spoken phrases and transitions; audio playback status
2 Filter eligible choices
Keep directions valid for this state.
Send a snapshot and recent history.
Offer only valid strategies and phrases.
Qualified local feedback
Gaze / pointing acknowledgments
and eligible turn milestones can
bypass a new model request.
3 MiniLM: decide strategy and wording
Choose a strategy, or observe;
then rank the offered phrases.
Requests are paced and bounded.
No new model request
does not bypass the gate.
Fresh Unity state at playback
Candidate for playback
4 LOCAL SCHEDULER + FINAL PLAYBACK GATE
Same trial and voice; request still current and not canceled?
Current evidence still qualifies this action and direction?
No contradictory cue while the controller is on the target?
Prepared clip ready; speech timing and repetition rules satisfied?
Fail
Pass
Not admitted: do not play now
Discard stale or invalid proposals;
reconsider timing when appropriate.
Admitted: play prepared audio
Record actual playback and update
speech memory; ElevenLabs voice.
