

Perceived Eeriness and Voice Similarity

Follow My Voice: Gaze-Contingent XR Search with a Self-Similar Agent — Participant Questionnaire

Study ID: _____ Use study ID only; do not write your name. You may skip any nonessential question.

Perceived Eeriness (after each block)

For each pair, mark the box that best describes how the assistant's voice felt during this block (1 to 7). Adapted from the Ho & MacDorman (2017) Eeriness index; the eeriness construct was applied to self-similar voices by Zibrek et al. (2018) and Guo et al. (2024). **[Transcribe the exact validated anchor pairs from Ho & MacDorman (2017) before participant use.]**

The voice felt...	1	2	3	4	5	6	7	...the voice felt
Reassuring	☐	☐	☐	☐	☐	☐	☐	Eerie
Natural	☐	☐	☐	☐	☐	☐	☐	Uncanny
Comforting	☐	☐	☐	☐	☐	☐	☐	Creepy

Perceived voice similarity (manipulation check):

Statement	1 Not at all	2	3	4	5	6	7 Extremely
How much did the assistant's voice sound like your own voice?	☐	☐	☐	☐	☐	☐	☐

Analyze the three eeriness items as a mean eeriness score and the similarity item as a manipulation check; do not exclude participants based on these ratings.
