

Gaze Study - Post-Session and Safety Survey

Annotated provenance copy - DRAFT

Qualtrics survey	SV_emqdHkeDg3gjYpw
Administration	After removing the headset at the end of the session
Annotation key	Yellow notes identify the source paper, instrument packet or study-created status for each item group.

This annotated PDF is for protocol, IRB and committee review. It records provenance and adaptations; it is not the participant-facing form.

Post-exposure safety

POST_INTRO - Instructions

DRAFT - Complete after removing the headset. Tell the researcher immediately if symptoms are severe or worsening.

Source / provenance: Study-created post-exposure safety instruction; safety procedure is project-specific.

POST_SSQ

Post-exposure Simulator Sickness Questionnaire. Use 0 = none, 1 = slight, 2 = moderate, 3 = severe.

Mark one response for each statement.

General discomfort

- ☐ 0 - None
- ☐ 1 - Slight
- ☐ 2 - Moderate
- ☐ 3 - Severe

Fatigue

- ☐ 0 - None
- ☐ 1 - Slight
- ☐ 2 - Moderate
- ☐ 3 - Severe

Headache

- ☐ 0 - None
- ☐ 1 - Slight
- ☐ 2 - Moderate
- ☐ 3 - Severe

Eyestrain

- ☐ 0 - None
- ☐ 1 - Slight
- ☐ 2 - Moderate
- ☐ 3 - Severe

Difficulty focusing

- ☐ 0 - None
- ☐ 1 - Slight
- ☐ 2 - Moderate
- ☐ 3 - Severe

Increased salivation

- ☐ 0 - None
- ☐ 1 - Slight
- ☐ 2 - Moderate
- ☐ 3 - Severe

Sweating

- ☐ 0 - None
- ☐ 1 - Slight
- ☐ 2 - Moderate
- ☐ 3 - Severe

Nausea

- ☐ 0 - None
- ☐ 1 - Slight
- ☐ 2 - Moderate
- ☐ 3 - Severe

Difficulty concentrating

- ☐ 0 - None
- ☐ 1 - Slight
- ☐ 2 - Moderate
- ☐ 3 - Severe

Fullness of head

- ☐ 0 - None
- ☐ 1 - Slight
- ☐ 2 - Moderate
- ☐ 3 - Severe

Blurred vision

- ☐ 0 - None
- ☐ 1 - Slight
- ☐ 2 - Moderate
- ☐ 3 - Severe

Dizziness with eyes open

- ☐ 0 - None
- ☐ 1 - Slight
- ☐ 2 - Moderate
- ☐ 3 - Severe

Dizziness with eyes closed

- ☐ 0 - None
- ☐ 1 - Slight
- ☐ 2 - Moderate
- ☐ 3 - Severe

Vertigo

- ☐ 0 - None
- ☐ 1 - Slight
- ☐ 2 - Moderate
- ☐ 3 - Severe

Stomach awareness

- ☐ 0 - None
- ☐ 1 - Slight
- ☐ 2 - Moderate
- ☐ 3 - Severe

Burping

- ☐ 0 - None
- ☐ 1 - Slight
- ☐ 2 - Moderate
- ☐ 3 - Severe

Source / provenance: Kennedy et al. (1993), Simulator Sickness Questionnaire (SSQ), 16 symptoms and 0-3 anchors.

POST_STOP

Did you stop or pause because of symptoms?

- ☐ No
- ☐ Yes

Source / provenance: Study-created safety stop/pause check; not an SSQ scoring item.

POST_READY

Do you feel ready to leave the lab?

- ☐ Yes
- ☐ No - researcher follow-up required

Source / provenance: Study-created researcher safety handoff check; not an SSQ scoring item.

Voice comparison and interview

POST_VOICE_PREF

Which voice did you prefer?

- ☐ Generic voice
- ☐ Voice resembling me
- ☐ No preference
- ☐ Unsure

Source / provenance: Study-created comparative voice-preference item, informed by Kao et al. (2021) and Guo et al. (2024).

POST_VOICE_REASON

Why did you choose that response?

Source / provenance: Study-created qualitative follow-up to the voice-preference item.

POST_HELPFUL

Which voice or combination felt most helpful, and why?

Source / provenance: Study-created qualitative voice/guidance evaluation; informed by Kao et al. (2021) and Guo et al. (2024).

POST_COMFORT

Which voice or combination felt most comfortable, and why?

Source / provenance: Study-created qualitative voice evaluation; informed by Kao et al. (2021) and Guo et al. (2024).

POST_SIMILARITY

Did you believe the self-similar voice resembled your voice? Why or why not?

Source / provenance: Study-created self-similar-voice manipulation check; informed by Kao et al. (2021).

POST_DIALOGUE

Did hearing the self-similar voice change how you experienced your own thoughts or internal dialogue? Please describe.

Source / provenance: Study-created exploratory qualitative item; no validated mechanism scale is claimed.

POST_CONCERNS

Did hearing the self-similar voice create any concern about misuse or how the voice was created?

Source / provenance: Study-created voice-safety and misuse concern item; no external instrument.

POST_CHANGES

What would you change about the hints, voice, or task?

Source / provenance: Study-created design-feedback item; no external instrument.

POST_INTERVIEW

Researcher notes from the semi-structured final interview (search strategy, useful or distracting feedback, voice experience, comfort, and suggested changes):

Source / provenance: Study-created researcher interview notes; no external instrument.

References and provenance notes

The annotations distinguish published instruments, source-paper adaptations and study-created items. They do not certify that an adaptation is validated for this headset or task.
